APPLICATION OVERVIEW DOCUMENT

Ticketing and Booking

Congratulations on completing your application definition! This document presents a summary overview of your application as defined in the Pega platform. It encapsulates the key elements of your application's design, highlighting its core functionalities and overall structure.

Please note that this is a high-level view and does not include granular details like data models or sample data. It's an ideal resource for a quick reference, facilitating discussions among team members and stakeholders, and for guiding strategic decisions in your application development process.

Blueprint ID: BP-2412458

Application Context

Develop a Movie Ticket Booking Management application that allows customers to request movie ticket bookings, enables staff to manage movie and show details and seating availability, captures customer confirmations, processes bookings, tracks booking status, and sends confirmation notifications to customers.

Organization name	Industry	Industry subsegment	Language
Internet Service Provider	Consumer Services	Entertainment	English

Application Architecture

Users access the application through defined channels, assume specific roles, and trigger workflows that manage how work progresses. Those workflows operate on shared Data Objects to ensure the system stays consistent and up to date.
